CANNED ALBACORE TUNA

The South American Pacific Ocean boasts a large expanse, teeming with albacore, sought after for their succulent meat. Since 2016, this region has outstripped Asia, claiming the title of the foremost exporter of superior Albacore Tuna globally. The adept team at The Southlander Catalogue is intricately involved in the operations of cutting-edge albacore fishing ventures, notably in its prized jewel, Ecuador. Here, we present to you top-notch Albacore Tuna, the monarch of the Pacific. We guarantee a year-round supply of nothing but the finest product, a feat only achievable by The Southlander Catalogue. This underscores our commitment to being your ultimate commerce partner for premium South American processed and bulk foods.

PRODUCT DESCRIPTION

Wild Albacore Tuna caught, processed and canned in either oil or water in the country of Ecuador.

The tuna is precooked, cooled, and cleaned to extract the completely clear loin, which is compressed and cut to place it in a round metal container.

Then it is mixed with the covering liquid, either oil or water, packaged in hermetically sealed containers, and subjected to a sterilization process to prevent alteration. The loins are obtained after the superficial cleaning of the medium-sized tuna. The presence of 18% of pieces or shreds occurs at the moment of cutting and packaging.

- Solid White Albacore Tuna Loins
- Chunk White Albacore Tuna
- Flaked Albacore Tuna

TECHNICAL SPECIFICATIONS

Product Name: Canned Albacore Tuna

Brand: SOUTHLANDER / AGUILAR

Raw Material Source: Albacore Tuna Fish

Scientific Name: Thunnus Alalunga

Product Characteristics:

- Tin-Canned Tuna Fish Loins
- Characteristic odor and taste of the species.

Ingredients: Albacore Tuna Fish, Water and/or Oil

Packaging: It is packed in tinsplate material, which is a very thin sheet of steel alloyed with tin and chromium. It has an internal coating of suitable sanitary varnish that is necessary to prevent components from migrating from the can to the food, or vice versa. It is characterized by being a recyclable, sterilized, vapor-impermeable, gas-exchange impermeable, lightweight container that does not allow the entry of light. 48 unit carton.

Weight: 175gr. net weight / 115 gr. drained

Product Use and Consumption: Suitable for the general public, however, not recommended for individuals allergic to fish.

Shelf Life: 48 months at temperatures of $-20 \pm 2^{\circ}\text{C}$.
